

I depend on XM Radio as an important part of my everyday life. I am a over-the-road truckdriver, not only do I use the service for entertain-ment, but it also serves as a tool for planning my trip each day. By providing nationwide weather it also provides traffic conditions in areas I am driving to or through allowing me to avoid the problems instead of becoming a part of it. If regular broadcast radio were to be more concerned with what the public wants and needs, instead of what program directors want, they wouldn't have the problem they are asking you to interfere in, as far as the entertainment aspect, before XM I used to spend a large part of my day with my finger on the scan button of my FM radio, not only is this aggravating, but it is a safety concern as my concentration is not totally on the road, so as you can see, this XM radio is of vital need especially to those of us who are traveling constantly delivering everything you use in your life.
